

MusicCrates

MusicCrates gives users a digital platform to organize their vinyl collection as detailed as they see fit.

MusicCrates is an application that allows a user to enter multiple different points of details about their vinyl record as they input it in; which allows individuals to keep extensive track of their collection. Including artist name, album title, pressing variant, size of pressing, where/when it was bought, and even how much the user paid for it. Whether their collection is large or small, each vinyl counts.

Personas

1. Busy mother
 - a. A busy mother who doesn't have the time to properly or extensively track her record collection and needs central place to keep her records in order.
2. Corporate businessman
 - a. A man who works a 9-5 yet enjoys collecting vinyl records on the side. He is a man that likes to keep everything in order, including his collection.

Competition:

1. Google Sheets/Microsoft Excel
2. Those who choose not to track their collection
3. Discogs
